

Comparing and Ordering Decimals

For Exercises 1–15, compare using $>$, $<$, or $=$.

- | | | |
|----------------------------|-----------------------------|-----------------------------|
| 1. $0.387 \bigcirc 0.378$ | 2. $4.8 \bigcirc 4.83$ | 3. $12.75 \bigcirc 12.749$ |
| 4. $8.32 \bigcirc 8.23$ | 5. $23.65 \bigcirc 22.66$ | 6. $7.382 \bigcirc 7.823$ |
| 7. $32.8 \bigcirc 32.80$ | 8. $61.23 \bigcirc 63.21$ | 9. $89.6 \bigcirc 89.06$ |
| 10. $5.36 \bigcirc 6.35$ | 11. $2.75 \bigcirc 2.750$ | 12. $11.53 \bigcirc 11.503$ |
| 13. $38.97 \bigcirc 39.87$ | 14. $64.381 \bigcirc 64.38$ | 15. $12.46 \bigcirc 12.48$ |

Use the graph for Exercises 16–18.

16. Which month has the most rainfall? _____
17. Which month has the least rainfall? _____
18. Which months have the same amount of rainfall?

Order from least to greatest.

- | | |
|--|---|
| 19. 21.600, 21.006, 21.060
_____ | 20. 38.88, 38.888, 38.8
_____ |
| 21. 8.23, 8.132, 8.123, 8.213
_____ | 22. 6.578, 5.687, 5.678, 5.876
_____ |

23. In 1994, a Greek drachma was worth \$0.0041220, an Italian lira was worth \$0.0006207, a Mexican peso was worth \$0.0002963, and a South Korean won was worth \$0.0012447. Order these currencies from the least value to the greatest value.

24. **Science** An egg laid by a vervain hummingbird weighs 0.0132 oz, and one laid by a Costa hummingbird weighs 0.017 oz. Which egg is smaller?
